60 minutes for 25 questions

Be aware that **the last questions take longer than the first ones**, so do not spend too much time on the early questions.

3 questions require you to write short pieces of code.

No points are deducted for incorrect answers in Multiple Choice Questions (single answer). **For Multiple Answers Questions, selecting incorrect options leads to a penalty within the question's score** (the final score for a question cannot go below 0, but selecting all options will not necessarily yield the maximum score).

C2 – Usage restreint

Python interpreter: The one you have been using during the training.

Course materials: Everything is available at: https://github.com/BEESPE/2026-10-HoT-Python-BA

Official documentation:

- Python: https://docs.python.org/3/
- pandas: https://pandas.pydata.org/docs/
- NumPy: https://numpy.org/doc/
- matplotlib: https://matplotlib.org/stable/index.html

LLM AI tools: You may use ChatGPT (https://chatgpt.com/) for coding-related questions during the exam. However, it should only be used for specific requests within a question, not to obtain complete answers. For general knowledge questions, online searches or AI tools are not allowed.
